Mobility

Mobility solar solution combines the features of solar power generation and mobility, making it easier to deploy small-scale new energy power plants.

Expandable

The system can be easily expanded and connected to other containers to meet different sizes of power needs.

Energy Saving and Environmentally Friendly

Using solar power as the main energy source reduces the need for traditional fuels and lowers carbon emissions.

Easy to deploy

Customised containers with galvanised steel frames, TOPCon N cells and other components are already installed in the containers and are ready to be deployed upon arrival.
